### Modified Features

1. Support swipe card to open lock2: when adding new person, you can link to lock 1 or lock 2, and after swipe card, the related lock will be open.

**Note:** before the lock was linked to card module DIP switch, now we cancelled this logic so that we can open different lock with same card module.

3. When open door2 with card or public password, but door2 is not enabled from main module KD8003, the device will prompt “Bi-Bi” sound and will not upload any event to iVMS or HikCentral (device will upload “invalid card” event in previous version firmware)

4. Support not showing the person in DS-KD-DIS and KD-TDM module.  
 When adding person, if you don't input the room No., this person will not be displayed in KD-DIS or KD-TDM module

Note: Latest baseline V3.9.0.5 still not support
