Smart Hybrid Light

ColorVu
Technology

Stunning Low Light Performance

View incredibly vivid images both day and night, powered by our advanced ColorVu technology. ColorVu delivers striking detail and exceptional clarity, enabling faster identification of search targets.

Customizable and Flexible Lighting for Intelligent Illumination

Explore tailored lighting modes which include covert black and white IR, dynamic full-color, or smart hybrid for adaptive nighttime target detection. This camera series enables you to experience versatile, high-performance security with intelligent illumination to meet your application needs.

Unmatched Versatility, Advanced Features

Leverage advanced features such as smart perimeter protection with human/vehicle detection for fast clip searching and people counting for streamlined staff optimization. Utilize Hikvision's Embedded Open Platform (HEOP) for innovative custom video security solutions that adapt to meet unique needs in the marketplace.
