

SOLAR-POWERED SECURITY CAMERA SYSTEM:

Sustainable & Flexible Security with Rapid Deployment Keeps Your Remote Area Safe

A fully assembled, standalone solar-powered security station for temporary sites and remote locations without a network or traditional power connections.

We've released the latest generation of Hikvision's popular Solar Camera Kit with a new ColorVu camera model and additional features such as a built-in heater and battery pack that enhance functionality in the field. The kit includes all the components needed to provide site security in remote or temporary locations that do not have access to a network or power, such as construction sites, outdoor venues, special event locations, residential and commercial applications, vineyards and more. The ColorVu surveillance camera provides enhanced images and video in full color, even at night.

The first of its kind in the industry, the solar kit offers numerous benefits:

Standalone wireless installation provides the flexibility to safeguard your home or geographically challenging remote areas or temporary sites

All-inclusive lightweight kit for mobility and sturdy weatherproof design to withstand heavy rains and weather

Environmentally sustainable, powered by the sun for daytime and nighttime operation

ColorVu cameras provide unmatched surveillance where incidents or accidents occur by illuminating poorly lit areas and providing 24/7 color imaging, reducing risk and improving safety

The complete solar camera kit includes a Hikvision security camera, a solar panel, a battery and a bracket for mounting.

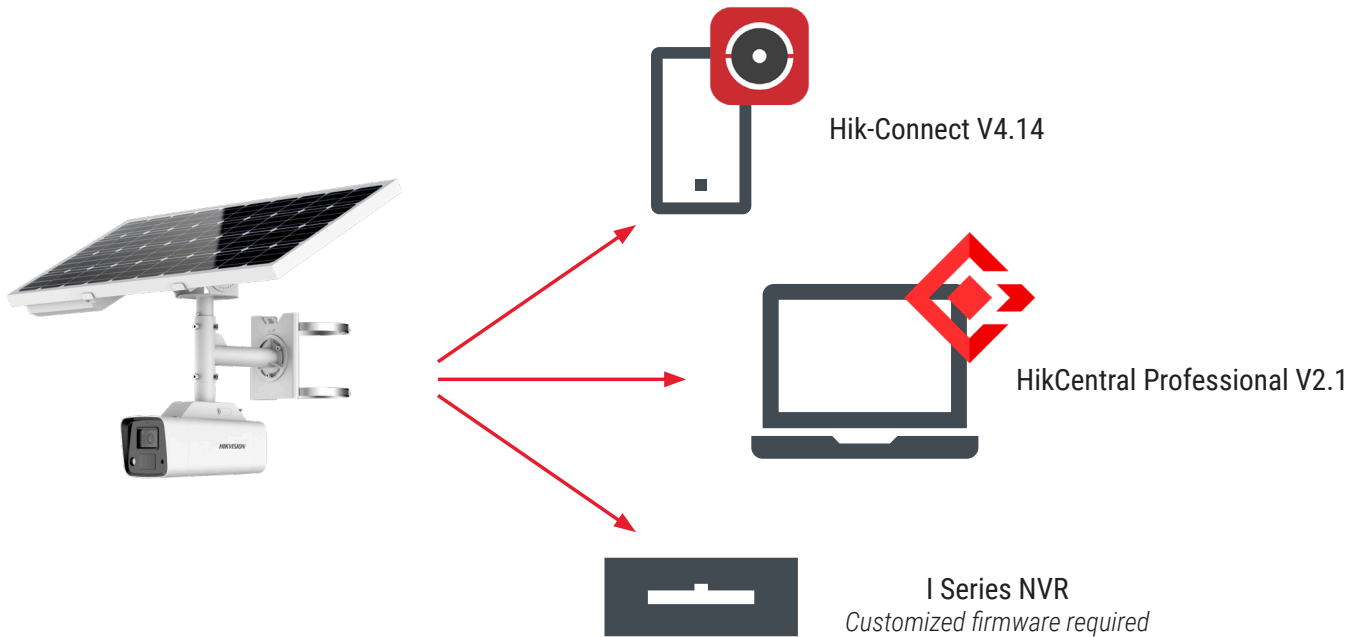

Security Without a Network or Traditional Power Source

PRODUCT SHOWCASE

- All-In-One Kit, Completely Assembled & Ready for Installation
- New ColorVu Camera Delivers 24/7 Color Imaging
- High Quality Imaging with 4 MP Resolution
- Built-in Battery Provides Up To 4.5 Days of Continuous Recording*
- Built-In Heater Improves Operability to Below 0 Degrees Fahrenheit (-20 Celsius)
- Rugged Design is Wind-Resistant and Waterproof (IP67)
- Lightweight for Easy Installation (<20 lbs.)
- Battery Power Notifications Available via Hik-Connect and HikCentral
