3. IP Camera DS-2CD7153-E Compatible Issue with Cisco PoE Switch

As customer's feedback some of DS-2CD7153-E cannot be start up by Cisco PoE switch, but can be start up by other brand (such as NetGear, Linksys) PoE switch

Our IP cameras are fully compliant with 802.3af standard. We sold several hundred thousand of 7153/7164 cameras, only got very rare PoE switch compatible issue.

There is handshake time range between PD and PSD. We believed that Cisco PoE switch is more strict than other brand PoE switch (such as NetGear, Linksys), so our camera cannot be start up by Cisco PoE switch, but still can be start up by other brand PoE switch.

Our USA team and R&D are doing more investigation. Current solution is changing a resistance on PCB to short handshake time to resolve Cisco PoE switch compatible issue.

4. Camera DS-2CC5173N-VP Manufactured in 06/2011 and 07/2011 Loose Lens Issue

We found that part of DS-2CC5173N-VP inventory (manufactured in 06/2011, 07/2011 have lens loose issue. We hold these cameras shipment, and are checking with HQ the solution.

Camera which is manufactured from 08/2012 do NOT have this issue, we will ship these camera to the customers if there is order.
